## Foreword

---

The Foundational Stage in school education, as envisaged by the National Education Policy 2020, serves as the cornerstone for the holistic development of children. It enables them not only to imbibe the invaluable *samskaras* rooted in our country's ethos and constitutional framework, but also to acquire basic literacy and numeracy. This foundation equips them to transition seamlessly into the more challenging Preparatory Stage.

The Preparatory Stage acts as a bridge between the Foundational and the Middle Stages, spanning three years from Grade 3 to Grade 5. The education provided during this stage builds upon the pedagogical approaches of the Foundational Stage. While the play-way, discovery, and activity-based learning methods continue, children are also introduced to textbooks and more formal classroom settings. This introduction aims not to overwhelm but to establish a foundation across curricular areas, promoting holistic learning and self-exploration through reading, writing, speaking, drawing, singing, and playing. This comprehensive approach encompasses physical education, art education, environmental education, languages, mathematics, basic science, and social science. This comprehensive approach ensures children are well-prepared both at the cognitive-sensitive and physical-*pranic* (emotional) levels to effortlessly transition to the Middle Stage.

The textbook, *Santoor* for Grade 3 is meticulously designed to align with these objectives. It adheres to the recommendations of the National Education Policy 2020 and the National Curriculum Framework for School Education 2023. The textbook emphasises conceptual understanding, critical thinking, creativity, values and dispositions essential for this developmental stage. It incorporates cross-cutting themes such as inclusion, multilingualism, gender equality, and cultural rootedness integrating appropriate ICT and school-based assessments. The engaging content and activities are designed to captivate students and encourage peer group learning, thus enriching the educational experience for students as well as teachers.

It is crucial to remember the pedagogical focus of the textbook emphasising understanding, critical thinking,

reasoning, and decision making. Children's innate curiosity at this stage should be nurtured by addressing their questions and designing activities based on core learning principles. While the play-way method continues, the nature of toys and games used for teaching evolves to enhance engagement rather than mere attraction.

While this textbook is valuable, children should also explore additional resources on the subject. School libraries should facilitate this extended learning, and parents and teachers should support their endeavours.

An effective learning environment motivates students, keeping them engaged and fostering curiosity and wonder vital for learning.

With confidence, I recommend this textbook to all students and teachers at the Preparatory Stage. I extend my gratitude to everyone involved in its development, hopeful that it will meet expectations. As NCERT remains committed to systemic reforms and improving publication quality, we welcome feedback to refine the textbook content.

## About the Book

---

Language lies at the centre of human cognitive, social, and cultural experiences. It enables effective communication, which is integral to the formation and functioning of societies and cultures National Curriculum Framework for School Education (NCF SE, p. 234). The present textbook is designed in alignment with the visionary framework of the National Education Policy (NEP) 2020 and the National Curriculum Framework (NCF) for School Education 2023. In the preparatory stage, students develop proficiency in speaking and competencies in reading and writing in both languages — Reading in Language 1 (R1) and Reading in Language 2 (R2). While students achieve these faster in R1, they are expected to gain familiarity with R2, gradually progressing from basic communication skills to greater fluency and proficiency in speaking and writing.

To take children well beyond foundational literacy and develop a genuine interest in independent reading, the textbook draws from children's real-life experiences and reflects their cultural and social milieu. It is purposefully crafted to meet specific stage competencies and grade-based learning outcomes, ensuring alignment with core principles of the subject. It uses language appropriate for the grade level and provides support for unfamiliar vocabulary and complex sentence structures. It incorporates digital elements and external references suitably within the material. Local context heavily influences content selection. The textbook aims to be engaging, striking a balance between visuals and text, leaning towards visually appealing material making it suitable for easy comprehension by young learners.

To foster oral skills, this textbook offers engaging learning materials that encourage students to converse with each other. The content features a range of activities such as reciting rhymes, singing songs, role-playing, etc., facilitating in-class practice. To enhance reading abilities, the textbook presents a diverse array of content, encompassing stories, poems, narratives and a comic strip. It maintains a balance between familiar and unfamiliar texts and contexts. With large font sizes, colourful illustrations, and captivating chapter titles, it captivates student interest. The text stimulates critical thinking

and sparks imagination, fostering curiosity. The content is structured to aid students in transitioning from guided to independent reading. For honing writing skills, the selected content systematically imparts writing proficiency. Students engage in activities that encourage independent practice, such as constructing simple sentences, encouraging creative expression and skill development in writing.

All these are done through various sections, like ‘Let us recite’, ‘Let us think’, ‘Let us speak’, ‘Let us learn’, ‘Let us listen’, and ‘Let us write’, ‘Let us do’, and ‘Let us explore’. This not only helps the learner in the process of language acquisition but also builds up their confidence level.

Curricular Goals (CG) lay the foundation of every learning-teaching material. In line with the textbooks for Classes 1 and 2, *Santoor* (Class 3) has been developed after careful consideration of the curricular goals. The curricular goals for language address the diverse needs of learners in a language classroom. Communication and comprehension are at the heart of every language and the same has been reiterated through CG1: Sustains effective communication skills for day-to-day interactions, enhancing their oral ability to express ideas. The book provides ample opportunities for learners to engage with the text and share their input. Sections titled ‘Let us speak’ and ‘Think and say’ subsection of ‘Let us think’ present opportunities for students to be creative with replies and share with classmates allowing learners to engage with language in a meaningful way.

Similarly, CG 4: Develops a wide range of vocabulary in various contexts and through different sources has been addressed by incorporation of texts and activities that are not limited only to literature but also encompass content areas like mathematics and ‘The World Around Us’ activities and vocabulary pertaining to the same find a place in different units. For example, Unit 1 has activities related to shapes whereas, Unit 4 provides scope for learners and teachers to discuss ordinal numbers.

In Class 3, although guided writing is the main component, there is a gradual progress towards making learners independent writers. This is in alignment with the CG 3 that develops the ability to express their understanding, experiences, feelings, and ideas in writing.

Reading as a process is not limited to decoding, says CG 2 which aims to develop fluency in reading and the ability to read with comprehension. The activities in *Santoor* are designed to evoke responses by the learners' reflecting their understanding of the text through the 'Answer the following' subsection.

One of the major recommendations of NCF-SE 2023 is the inclusion of knowledge of India. Indian values and traditions have been presented to the learner in an easily comprehensible way, for instance the passage on *Makar Sankranti* and its various manifestations.

The theme of Unit 1 is 'Fun with Friends'. This unit encourages language acquisition through friendly animals, and imaginative characters as a lens, allowing them to seamlessly integrate cross-curricular elements of Mathematics. Through engaging exercises, they learn that friendship may be between children as well as with the environment. It also kindles their imagination with whimsical characters of shapes to aid language learning through a joyful, play-driven process. This unit emphasises the value of friendship.

Unit 2 titled 'Toys and Games', takes the children into the world of indigenous toys and games. The chapters, 'Out in the Garden' and 'Talking Toys' give a glimpse of the world of toys taking the child into the imaginary world with emphasis on the joy of playing. Chapter 3, 'Paper Boats', emphasises on the joy of making and sharing simple toys.

Unit 3 titled 'Good Food' in Chapter 1, 'The Big Laddoo' steers us into the wondrous world of laddoos and sweets, while playfully introduces the concept of size. Chapter 2 'Madhu's Wish' identifies the significance of water in our lives with an equal importance to good and healthy food. Chapter 3 'Thank God' makes students delve into the vibrant world of an orchard. It not only imparts knowledge of fruits but also instills a sense of gratitude.

Unit 4, titled 'The Sky', begins with the Poem 'Night'. In the poem a young child wonders about his day and how it is shaped by the sunset and sunrise. The first prose piece of the Unit 'Chanda Mama Counts the Stars' is a story that introduces the concept of infinity through the characters of the Sun and the Moon. In the third text, 'Chandrayaan', siblings

Rani and Prateek try to get a glimpse into India's Lunar Mission 'Chandrayaan' with the help of their neighbour 'Nandini Aunty' who is a scientist.

Language and literacy, physical, socio-emotional, aesthetic and cognitive domains have been integrated along with the development of positive habits to create a learning impression in totality for children. Development of *Annamaya*, *Pranamaya*, *Manomaya*, and *Vignyanmaya kosha* is an ongoing process which leads to the manifestation of *Anandmaya kosha*. The present textbook is a step in this direction.

In addition to the material provided in the textbook, teachers may also use the matter embedded in the QR code. Further, as suggested in 'Note to the teacher' section given throughout the book, teachers are encouraged to use local stories, proverbs and objects in the classroom, as well as audio and video support from DIKSHA platform. The textbook is only one tool, learning needs many resources. Children absorb a wealth of knowledge by observing their surroundings, interacting with peers, elders like grandparents, engaging in hands-on activities, watching TV, using mobile devices, playing with toys and games, listening to stories and poems, working on projects, visiting culturally significant places, and travelling. It is crucial to appreciate and align this diverse learning with the competencies and curricular goals set for this phase. Educating our children is a shared responsibility that extends beyond formal textbooks.

## Chapter 2. Badal and Moti

0332CH02

Let us read

There was a boy called Badal. He lived with his mother in a village and they were very happy. One evening, when Badal was returning from school, he saw a puppy shivering in the cold.

Badal brought him home. "Can this puppy stay with us, Maa?" asked Badal. "Yes beta, but only if you promise to take care of the puppy", said his mother with a smile. Badal and his mother named the puppy Moti. As days went by, Moti grew up and loved Badal. They became best friends. They ate and played together. Moti followed Badal wherever he went. They played their favourite games together.

One rainy day, while Badal was on his way home from school, he slipped on the muddy lane and fell into a deep pit. He tried hard, but could not come out of the pit. Badal's mother was worried when he did not come home in time. Moti too was waiting at the gate. Badal's mother gathered the neighbours to help search for him. Moti too accompanied them.

Moti caught Badal's scent. He followed the scent and went near the pit and started barking. This alerted the neighbours who were searching for Badal. They used a rope to pull Badal out of the pit. Everyone was relieved. Badal hugged and thanked Moti.

c) Badal's mother was worried when he did not come home in time. ( )

d) Moti caught Badal's photo. ( )

e) Badal hugged his puppy Moti and thanked him. ( )

## Chapter 3. Best Friends

Let us read

There were four friends — Circle, Square, Triangle and Rectangle. One day there began a fight between the friends. Each of them said they were the best.

Circle said, "I am the best! I am round and beautiful. I have no sharp edges. Children use me to draw a smiling face. There are so many beautiful things in my shape. I am the best!"

The other shapes refused to agree with the circle. Square then said, "I am the best! I have four sides and all of them are equal in size. Children eat many sweets which are square in shape. I look very beautiful and so I am the best."

After listening to this, Triangle said in a loud voice, "I am the best! Just look at me! I am so beautiful. I have three sides. Children use me to draw mountains. They enjoy many yummy snacks in my shape. So, I am the best!"

Listening to the other three friends, Rectangle laughed aloud. "Of course not. No one can be better than me. I have four sides. Two are equally long and two are equally short. I look so beautiful. Children enjoy biscuits and chocolates in rectangle shape. They also use so many things in my shape. I am the best!" said the rectangle.

What do you think will happen now?

The friends could not decide who was the best among them. They decided to ask the first person they meet.

After some time, they met a star. They stopped her and told her of their fight. They asked her to decide who was the best among them.

The star was wise. She looked at all of them. She thought for a while. Then she said, "All of you are friends. Then why should you fight? Let me tell you something very important. Do you know what you could do if you were together? You could create the most beautiful pictures and patterns! Just look around. We find amazing designs and things in all the shapes. So, stop fighting. Together we all can create wonders."

The friends realised their mistake and promised each other that they would never fight again. They remained best friends forever.

balls and many others. All the toys in the toy shop were waiting to see who would buy them.

"Look there," shouted the toy kitten. They saw two girls coming towards the shop.

But they passed by just looking at the toys through the windows.

"Oh, no!" exclaimed all the toys at once.

After some time, a girl and a little boy stopped at the door of the toy shop. Their father stopped too.

The girl pointed at the board games displayed in the shop. Finally, she chose the game 'Snakes and Ladders'.

“Ohhhh”, sighed the toys together.

Next, they saw a woman and her son coming in. There was excitement in the shop among the toys.

A talking doll said, “It would be so nice if they pick me up.”

“I would be happy if they chose me,” thought the toy elephant.

“Namaste! How may I help you?” asked the toy shopkeeper.

“Namaste! I want to buy a toy for my son,” said the woman looking at the toys in the racks.

“Aayi! I want that Vande Bharat train,” said the little boy pointing to the toy train.

What do you call your mother?

Aayi bought the Vande Bharat toy train. The little boy was happy.

Then two girls came in.

The toys looked at them eagerly.

"Zoooooooooooooom! Friends! I think they would like to fly me," said the aeroplane confidently.

"Trin ... Trin ...! I think they may like to play with me," thought the toy phone.

One girl bought marbles and the other bought the toy aeroplane.

After a while, a group of children came into the toy shop.

"Wow! I like this toy elephant," said the girl with long hair.

"I will take this spinning top," said the boy with the red cap.

"I like these cute dancing dolls," said the boy in the blue shirt.

The children bought the toys. They left the shop cheerfully.

The boy thought for a minute and said, "I will not do it again, but I also want to play. Can you help me?"

Meena said, "I have enough paper. You can make boats for yourself."

The boy answered, “I don’t know how to fold the paper to make boats.”

Meena said, “That’s easy, I will help you.” She showed him how to make the boats.

Meena took out coloured paper of different sizes. She showed the boy how to fold and re-fold the paper to make a boat. The boy watched carefully. Then he took a piece of paper and started to make a paper boat. Soon a few boats were ready.

## Chapter 8. Thank God!

0332CH08

Let us read

Once upon a time, there was a farmer who liked fruits. So, he decided to grow fruits on his land. He worked hard to grow a variety of fruits. With hard work and care, the trees grew well. He took special care to grow grapes and watermelons in a small corner of his farm.

When the fruits were all ripe and ready to be eaten, the farmer decided to gift the best fruit to the king. Then his wife said, "This year, the best fruits on our farm are the watermelons and the grapes." The farmer thought about it and said, "Since it is a long journey to the palace, I shall take the grapes as watermelons are too heavy." So, he put bunches of grapes in a basket and walked to the king's palace.

What do you think will happen next?

The farmer reached the palace. He told the palace guard that he had brought a gift for the King. The palace guard then took him to the royal garden. The farmer saw the King playing with the princess. So, he quietly kept the basket full of grapes in front of him and sat down.

When the King sat down to rest, the guard brought the basket of grapes to the King. The guard pointed to the farmer and told the King that the grapes were a gift from the farmer. The King saw the farmer. The King was still in a playful mood. He took a bunch of grapes from the basket. He plucked out one grape and popped it into his mouth. Then he plucked another grape and threw it playfully at the farmer.

When the grape hit the farmer's forehead, he said, "Thank God!"

The King was surprised! He threw a grape again.

The farmer again said, "Thank God! I am blessed!"

The King asked the farmer, “Why are you thanking God when I am throwing grapes at you?”

The wise farmer replied with a smile, “O mighty King! I had grown the best grapes and watermelons on my farm. I chose the grapes to gift to you. Imagine if I had brought watermelons! Indeed, God is great!”

## Chapter 9. Madhu's Wish

0332CH09

Let us read

Madhu loved food. He always wanted to eat different kinds of food and snacks. He was never tired of eating. Every day, at noon, he would sit under a banyan tree and eat his lunch. One day, as he was eating, an old

man came. Madhu felt sorry for him and shared his food with him. The old man was so happy that as he was leaving, he said, "My child, you have been so kind. In return, you can wish for anything from this tree and it will be granted." Madhu felt very happy.

What do you think Madhu will do now?

He thought, I can ask for different types of food, and enjoy them forever. He sat there and closing his eyes said, "Oh tree, let me have different types of food. Nothing else."

He heard a voice from the tree. "You don't want anything else? Think it over." Without thinking, Madhu said, "Nothing else". First, he asked for laddoos. At once, a basket full of laddoos appeared.

What do you think will happen now?

He happily started eating it. After some time, he got bored. Then he thought of colourful fruits. Immediately, fruit in baskets appeared. He started eating them. There were grapes, mangoes, apples, bananas, jackfruit, melons, guavas, oranges and many more. Then he got bored eating only fruits. He asked for

savouries. Immediately savouries like *matri*, *samosas*, *kachori*, potato chips and *vada* appeared in huge baskets. He happily started eating them.

As he was eating, he suddenly got hiccups. He wanted water. He looked around. There was food everywhere but no water!

He asked for water but the tree said, "You wanted only food not water."

"So what if I don't get water I will have *sharbat*, *kheer* and *badam* milk for my thirst," thought Madhu. Soon, all these appeared in jugs.

Madhu drank them all but the hiccups did not stop. They became louder. He was now desperate for water.

He prayed to the tree, "May all this food disappear, and let me have water instead."

"Are you sure?" the voice from the tree asked.

"Yes, I am sure. Now I know the importance of water. No other

drink can replace water.  
Please give me just water.”

A jug of water appeared. Thirsty,  
Madhu drank as though he had  
never seen water. His hiccups stopped.  
He was no longer thirsty.

The Spy starts by saying, 'I spy with my little eye something that is ...' and gives a clue. For example, 'I spy something that is blue!' Then, everyone looks around and tries to find something that is blue.

Maybe it's a pen, a chair, or even someone's shirt!

If it's tricky to guess the object right, the Spy can give more clues. The child who guesses right becomes the new Spy! Keep playing, taking turns being Spies and guessing until everyone gets a chance to be the Spy.

Chanda Mama fell asleep!

The Sun peeped out from behind the clouds. It was morning. Chanda Mama woke up in the evening. He began to count again. But he had forgotten where he had stopped!

By the time he remembered, the night was over.

However, he continued to count the stars night after night. Often, he would forget the count.

One night, he was very upset. He began to cry. "Ooohh ... Ooohh ... What is this? I am never able to complete my counting."

On seeing his tears, the Sun smiled, "Don't worry! Why do you cry? I can tell you how many stars there are in the sky."

"Really? How many?" Chanda Mama was surprised.

The Sun replied joyfully, "The number of lovely children is the same as the number of stars in the sky."

“Why is the sky blue?”

“Where does the Sun go at night?”

One evening, Rani heard her mother singing, “*Chanda mama door ke ...*”

Hearing this, Rani asked her mother, “Amma, how far is the Moon?” Amma said, “Rani, the Moon is very far in the sky”.

Rani kept on thinking about the moon and fell asleep.

The next morning Rani woke up hearing the loud voice of her elder brother, Pratik. He was pointing to the TV and

shouting in excitement, “Look Rani, India is on the Moon!”

Rani looked at the TV. She could see photos of some machines on the Moon. She heard a few people talking about the landing on the Moon. She was confused and asked Pratik, “How did Chandrayaan reach the Moon?”

Have you seen pictures of Chandrayaan landing on the moon?

Pratik replied that his friend Vivaan’s mother, Aunt Nandini, is a scientist. “Shall we go and talk to her?” asked Pratik. Rani happily agreed. Both Rani and Pratik decided to visit Vivaan’s house.

Vivaan and his mother welcomed them. Rani could see many models and photographs of rockets in their house.

Nandini Aunty offered *sharbat* to the children and said, "Rani, what do you want to know?"

Rani replied, "People say India is on the Moon. Can you please tell us more about this?"

Aunty said, "Yes, of course. Do you know which vehicle is used to go to the Moon?"

Pratik immediately said, "I know Aunty, it is a rocket. I had seen on the TV".

Rani pointed to the models and photos of rockets in the room.

Nandini said, "Very good. Yes, a rocket is used to reach the Moon."

Rani asked, "What does Chandrayaan mean?"

Nandini replied, "Chandra means Moon and Yaan means vehicle. On 23 August, 2023, India became the first country to land on the far side of the Moon."

Rani jumped with excitement and said, "Can I go to the Moon, too?"

Nandini smiled,
